From a pharmacological perspective the main ingredients of ayahuasca are DMT and the N-carboline derivative alkaloid harmine, harmaline, and tetrahydroharmine (Callaway et al., 1996). The harmine, tetrahydroharmine, and harmaline work as reversible inhibitors of the A-type isoenzyme of the …

Mother can often apply to a woman other than the biological parent, especially if she fulfills the main social role in raising the child. This is commonly either an adoptive mother or a stepmother (the biologically unrelated partner of a child's father). The term "othermother" or "other mother" is also used in some contexts for women who provide care for a child not biologically their own in

30/09/2015 · The endosomal-lysosomal system is made up of a set of intracellular membranous compartments that dynamically interconvert, which is comprised of early endosomes, recycling endosomes, late endosomes, and the lysosome. In addition, autophagosomes execute autophagy, which delivers intracellular contents to the lysosome. Maturation of endosomes …
